

WaterSmart Awareness Introduction

The following can be used as an introduction/icebreaker at the beginning of the workshop.

Q: If all the world's water were fit into a gallon jug, how much fresh water would there be available to use?

A: Only 1 Tablespoon!

Q: How much of Earth's water supply can be used as drinking water?

A: Less than 1%

Q: How much of our fresh water supply is located in Antarctica?

A: 90%

Q: How many gallons of water does the average American use every day?

A: About 100 gallons!

Q: How much of the human brain is water?

A: 75%
